10 - Adding code or code block

When you have to write a single programming line you have to use " ` " at the start and at the end of program line

e.g is given below

To print string in python use `print ("Codanics")`

When you have to write a multiple programming lines or block of code you have to use " ``` " at the start and at the end of program line

e.g is given below

This will display syntax as Python language

```
a = 5 + 9
b = 7 - 10
c = a * b
d = c * b
print(d)
```

This will display syntax as R language

```
a = 5 + 9
b = 7 - 10
c = a * b
d = c * b
print(d)
```
